

 Summary

B.Tech Computer Science (AI/ML) student with hands-on experience building AI applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, and modern backend technologies. Skilled in developing end-to-end AI solutions with FastAPI, vector databases, cloud technologies, and more with a strong interest in building scalable AI systems for real-world applications.

 Skills

Programming Languages: Python, SQL, C++

AI & Machine Learning
Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Semantic Search, Vector Embeddings, NLP

Frameworks & Libraries
FastAPI, Flask, Sentence Transformers

Databases & Vector Stores
PostgreSQL, Supabase, Pinecone, Redis

Cloud & DevOps
Microsoft Azure, Google Cloud Platform (GCP), Docker, Git, GitHub

Tools & Technologies
Google Gemini API, Ollama, Playwright, JWT Authentication

 Education

Raath International School, Alwar
CBSE – Class X & XII | 2022, 2024

Manav Rachna International Institute of Research and Studies
B.Tech in CSE (AI/ML) | Expected May 2028

 Experience

Eco Plug Energy India Pvt Ltd.
AI/ML Intern

Jun 2026 - Jul 2026

Developed a production-style AI assistant for an EV charging platform using Google Gemini, FastAPI, RAG, Supabase, and vector databases. Developed backend APIs, authentication, WhatsApp integration, and intelligent retrieval pipelines to automate customer support.

Algo Shack Technologies
AI Intern

Jul 2025 - Jul 2025

Conducted research on Retrieval-Augmented Generation (RAG), text chunking, and retrieval optimization techniques to improve context-aware AI applications and support the development of LLM-powered solutions.

Projects

- **KnowledgeForge – Production-Grade RAG Platform - [GitHub](#)**

Developed a production-grade Retrieval-Augmented Generation (RAG) platform enabling users to ingest documents from PDFs, websites, GitHub repositories, and Google Drive for AI-powered question answering with accurate citations. Built using FastAPI, React, Pinecone, Supabase, Redis, Docker, and Google Gemini, featuring BAAI/bge-small-en-v1.5 embeddings, hybrid retrieval, cross-encoder reranking, streaming responses, authentication, and production-grade security.

- **Nexus Talent AI – AI Resume Analyzer & Career Intelligence System – [Live Demo](#)**

Built a full-stack AI platform using Python and Flask, leveraging a pre-trained transformer model (sentence-transformers) for semantic resume-job matching. Implemented multi-format resume parsing with OCR and designed a weighted scoring system for skill alignment and resume evaluation, generating detailed feedback reports.

- **Intelligent Voice Assistant & Automation System - [GitHub](#)**

Developed a voice-controlled AI assistant using Python and a locally deployed LLM (Mistral via Ollama) for real-time conversational responses and code generation. Integrated speech recognition, neural TTS, and system automation, along with a web dashboard for real-time monitoring.

Certifications

- Oracle - Oracle Cloud Infrastructure 2025 Certified Generative AI Professional 
- Microsoft Certified: Azure Developer Associate 
- Microsoft - Security Essentials Professional Certificate by Microsoft and LinkedIn 
- Deloitte - Data Analytics Job Simulation
