SUMMARY

B.Tech Computer Science (AI/ML) student experienced in building LLM based applications, RAG applications, MCP servers, and AI-agent systems using Python, FastAPI, vector databases, and cloud technologies. Strong interest in developing production-ready AI systems, developer tools, and intelligent automation solutions.

EDUCATION

Manav Rachna International Institute of Research and Studies

B.Tech. Computer Science and Engineering (AI/ML)

Raath International School

CBSE – Class X & XII

Faridabad, Haryana

Expected May 2028

Alwar, Rajasthan

2022 – 2024

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

CS Fundamentals: Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS)

AI & Machine Learning: LLMs, RAG, AI Agents, Semantic Search, Vector Embeddings, NLP

Frameworks & Libraries: LangChain, FastAPI, Flask, Sentence Transformers

Databases & Vector Stores: PostgreSQL, Supabase, Pinecone, Redis

Cloud & DevOps: Microsoft Azure, Google Cloud Platform, Docker, Git, GitHub

Tools & Technologies: MCP, Ollama, WhatsApp Cloud API, Twilio

EXPERIENCE

Eco Plug Energy India Pvt. Ltd.

Jun 2026 – Jul 2026

AI/ML Intern

- Developed a production-style AI assistant for an EV charging platform using Google Gemini, FastAPI, RAG, Supabase, and vector databases.
- Developed backend APIs, authentication, WhatsApp integration, and intelligent retrieval pipelines to automate customer support.

Algo Shack Technologies

Jul 2025

AI Intern

- Conducted research on RAG, text chunking, and retrieval optimization techniques for context-aware AI applications.
- Supported LLM-powered solutions through research and experimentation with retrieval techniques.

PROJECTS

KnowledgeForge – Production-Grade RAG Platform [🔗 GitHub](#)

FastAPI, React, Pinecone, Supabase, Redis, Docker, Google Gemini

- Developed a production-grade RAG platform for ingesting PDFs, websites, GitHub repositories, and Google Drive content for AI-powered question answering with accurate citations.
- Implemented BAAI/bge-small-en-v1.5 embeddings, hybrid retrieval, cross-encoder reranking, streaming responses, authentication, and production-grade security.

Blueprint – Deterministic MCP Server for AI Repository Context [🌐 Live Application](#) [🔗 GitHub](#)

Python, MCP, AST, pytest, ruff, mypy

- Built a deterministic repository intelligence engine using static analysis, Python AST analysis, project/framework detection, persistent knowledge generation, six MCP tools, and incremental caching for AI coding agents.

Nexus Talent AI – AI Resume Analyzer & Career Intelligence System [🌐 Live Application](#) [🔗 GitHub](#)

Python, Flask, Sentence Transformers, OCR

- Built a full-stack AI platform using Sentence Transformers for semantic resume-job matching, with multi-format parsing, OCR, weighted skill alignment, and detailed evaluation reports.

Intelligent Voice Assistant & Automation System [🔗 GitHub](#)

Python, Mistral, Ollama, Speech Recognition, TTS

- Developed a voice-controlled assistant using Python and locally deployed Mistral through Ollama, integrating speech recognition, neural TTS, system automation, code generation, and a web dashboard.

CERTIFICATIONS

- **AWS:** AI Agents: Cognitive Upgrade and Business Efficiency
- **Microsoft:** Azure Developer Associate
- **Deloitte:** Data Analytics Job Simulation
- **Oracle:** Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
